

MACHINE SAFETY ALIGNMENT INITIATIVE (MSAI)

ONE CORPORATE STRATEGY. EVERY FACILITY.

MSAI helps multi-site manufacturers develop a standardized machine safety framework that aligns corporate objectives with facility-level execution—creating consistency today while supporting long-term continuous improvement.

WHY MSAI?

Rather than treating machine safety as a series of individual projects, MSAI establishes a repeatable corporate framework that helps every facility work toward the same standards and objectives.

YOUR ORGANIZATION RECEIVES:

-  One Corporate Machine Safety Strategy
-  One Corporate Standards Framework
-  One Machine Safety Toolkit
-  One Multi-Facility Risk Reduction Roadmap
-  One Turnkey Implementation Partner
-  Annual Program Reviews & Continuous Improvement

WHAT THE PROGRAM INCLUDES

-  **EXECUTIVE STRATEGY SESSION**
Collaborate with corporate leadership to define objectives, governance, priorities, and a long-term machine safety strategy.
-  **CORPORATE STANDARDS DEVELOPMENT**
Develop practical engineering and safeguarding standards that create consistency across every facility.
-  **MACHINE SAFETY TOOLKIT**
Receive checklists, templates, calculators, assessment resources, and implementation tools to support standardized decision-making.
-  **FACILITY ASSESSMENT FRAMEWORK**
Establish a consistent assessment methodology and deploy facility-specific Risk Reduction Prioritization Programs (RRPPs) to build phased implementation roadmaps.
-  **EXECUTIVE DASHBOARD & DOCUMENTATION**
Maintain visibility through standardized reporting, documentation, and a centralized repository that preserves institutional knowledge through personnel changes.
-  **TURNKEY EXECUTION**
When projects are ready to move forward, PowerSafe provides engineering, fabrication, controls integration, installation, validation, and training—all through one experienced partner.

BEST FIT FOR

-  Multi-site manufacturers
-  Corporate Safety & EHS Leaders
-  Corporate Engineering & Operations Teams
-  Organizations seeking consistent machine safety standards
-  Companies planning long-term risk reduction investments
-  Manufacturers expanding through acquisitions

WHY POWERSAFE?

PowerSafe combines strategic planning with practical execution.

Unlike programs that end with recommendations, we support the entire machine safety lifecycle—from strategy and standards development through facility assessments, engineered solutions, installation, validation, and ongoing program reviews.

READY TO BUILD A CORPORATE MACHINE SAFETY PROGRAM?

Whether you're establishing your first corporate machine safety framework or improving an existing program, MSAI provides a structured strategy, repeatable safeguarding for safeguarding, standardizing safeguarding, and supporting implementation across every facility.
